REMARKS

This Response to Restriction Requirement, Election of Invention, and Amendment is in response to the Office Action mailed March 19, 2001, wherein the Examiner indicated that under 35 U.S.C. § 121, three patentably distinct inventions were claimed, thus a restriction requirement was issued. Applicants elect to prosecute the invention of Group I, namely, the method for detecting LDL and denatured LDL in blood in claims 1-8.

By the present Amendment, Applicants have amended claims 9-11 and added new claim 12. Consequently, claims 1-12 are currently pending. Entry of this Amendment and early reconsideration of this application is respectfully requested.
